
SGB – CAPE

ENABLING A BETTER TOMORROW, EVERY DAY

WE MAKE IT POSSIBLE FOR PEOPLE, COMPANIES, COMMUNITIES AND ENVIRONMENTS TO THRIVE

Company Profile

We are WACO

www.sgbcape.com

WHO WE ARE

HISTORY

SGB Scaffolding Systems (SGB), the South African division of Waco Africa, was formed in 1948 and operated solely in the scaffolding business until February 2005, when Waco Africa acquired Cape Contracts, a company which had been offering insulation, scaffolding and corrosion protection services for more than fifty years.

As part of Waco Africa's strategy to provide sustainable stakeholder value and meet the ever-increasing need for a 'one-stop' integrated service, it was decided to combine these offerings. SGB and Cape Contracts integrated into a brand-new division of Waco Africa called SGB-Cape.

Waco Africa is owned by **Waco International** and well-respected black empowerment partner **Bopa Moruo**.

The Group provides services in formwork, insulation, painting and abrasive blasting, shoring and scaffolding, hydraulic and suspended access platforms, relocatable module buildings, portable sanitation products and integrated hygiene services with operations in South Africa and other sub-Saharan countries.

OUR FOOTPRINT

SGB-Cape has an international footprint, with our operational facilities strategically established throughout **South Africa**, **Namibia**, **Zambia**, **Angola**, **Ghana** and **Uganda.**

Other neighbouring countries are being serviced on a project basis.

WHAT SETS US APART

COMPANY CAPABILITIES

SGB-Cape is the largest industrial services company in South Africa, and helps clients achieve their project, plant maintenance, shut down, and new build objectives. We are proudly performance driven and committed to quality and client service by focusing on **SERVICE DELIVERY**, **SAFETY** and **COMPETITIVE PRICING**.

Our multidisciplinary services are designed to cater directly to client needs, to be coordinated and directed by experienced management teams and implemented by a highly trained workforce. The concept is intended to eliminate contractor interface problems by providing integrated services from a single source. The inherent flexibility allows us to consistently meet deadlines while never compromising on our high standards of integrity and build quality.

Benefits to clients include:

- **TIMEOUS DELIVERY**
- **LESS CONTRACT ADMINISTRATION**
- **BETTER COMMUNICATION**
- **NO DUPLICATION EFFORT**
- **SAVING TIME AND MONEY**

WE COME TO YOU

We understand the complexities of mobilising large groups of people in Africa. Thanks to our extensive knowledge of local communities of the countries in which we operate, you can rest assured we'll be able to have our entire team mobilised and ready for the start of the project.

No other contractor has a geographical footprint as large as SGB-Cape on the continent, and from this deep knowledge of the local regions, laws of the countries, and the complexities of working in Africa, we are able to handle all conditions with ease.

INTERNATIONAL STRENGTH

Being a truly international company makes us the perfect candidate to complete your project.

Waco International's **HIRE FLEET**, its **SCALE**, its **FINANCIAL STABILITY**, **DIVERSITY**, **TECHNOLOGY**, and extensive **GEOGRAPHIC FOOTPRINT**, offer a strong competitive advantage to service the needs of its customers.

LOCAL KNOWLEDGE

SGB-Cape has been operating successfully across Africa for many years and have completed numerous projects across the continent.

Having local knowledge is critical when navigating the nuances of doing business in Africa. Understanding **LOCAL LAWS** and **LABOUR PRACTICES** means that industrial action can be avoided, and all staff are treated with due care and consideration for their culture.

As in any sector, and in any country, having the right contacts provide an advantage which is immediate. Being in Africa for such a long time, we have navigated through the trials associated with entering a new market and have built up the contacts and connections we need to help us ensure the very best in HR, logistics, welfare, and training for our staff.

QUALITY ASSURANCE

The SGB-Cape quality system **COMPLIES WITH ISO 9001:2015 REQUIREMENTS** and is certified by DQS. Audits are conducted on an annual basis by internal and external auditors.

SGB-Cape has competent resources in Quality Control, Coating and Insulation inspection. The Quality Controllers are certified by SAQI upon completion of the Quality Control Certification. The Paint and Insulation inspectors are certified in NACE Coating Inspection and Icorr Insulation Inspection.

WORLD-CLASS

At SGB-Cape, we know that the buck stops with us when it comes to safety on site.

We work to the highest international standards to not only ensure the safety of our staff and the other contractors around us, but also to uphold the reputation of the client. We realise action speaks louder than words, and we look forward to engaging with your management and delivering zero harm.

ZERO HARM

At SGB-Cape, **WE STRIVE FOR ZERO HARM**. It is our intention and practice to pursue rigorously high standards in order to improve the safety and health of our employees and to protect the environment. Ensuring world-class health, safety, and environmental protocols are in place is not only responsible behaviour, but it also leads to a sustainable and safe working environment for our clients and our staff.

SGB-Cape follows the **NOSA 5 STAR SYSTEM** and specifically the **CMB 150 and 253** audit protocols. Our in-house developed integrated HSE system meets the requirements of **ISO 14001:2015** and **ISO 45001:2018** and we have passed numerous strict compliance audits by many of our clients. We are a corporate member of **SAIOSH**.

Many of our sites have been graded a NOSA 5 Star status, and some branches have been awarded a NOSCAR award year after year.

CORE SERVICES

ACCESS & SUPPORT SCAFFOLDING

SGB-Cape is the largest scaffold company in Southern Africa and has been servicing the industry since 1948. Our diverse product offering, coupled with the knowledge and expertise of our highly trained employees, remains unsurpassed. With our continual development of scaffolding systems and components, we provide improved access solutions to our clients, which in turn advances the safety and productivity for their personnel and other subcontractors on site. **SGB-CAPE IS A MEMBER OF THE INSTITUTE FOR WORKING AT HEIGHTS 'IWH'**.

Our current portfolio of service offerings includes:

- Industrial Access
- Suspended Access
- Building Access
- Temporary Seating
- Event Structures
- QuikDeck® Suspended Platforms
- A continuous equipment refurbishment programme
- A dedicated design department providing innovative designs with Auto-CAD drawings and supporting calculations
- Patented industry specific solution components
- Comprehensive insurance, including public events

ENTERTAINMENT, EVENT PLATFORMS & SEATING

SGB-Cape offers the entertainment industry a unique service in that we can supply specially designed systems to suit almost any location or configuration that may be required.

Our experience and capacity allow us to supply large volumes of seating for world events in any location in South Africa. **ALL OUR SPECIALLY DESIGNED COMPONENTS AND PRODUCTS HAVE BEEN FULLY TESTED AND COMPLY WITH ALL REQUIRED INDUSTRY REGULATIONS**.

We offer, amongst others:

- Seating stands available in three different risers
- TV towers
- Platforms and decks
- Podiums and stages

SGB-Cape is also involved in the setup of world-class events, including the likes of:

- A1 Racing, Durban
- Presidents Cup Golf
- Comrades Marathon
- Nedbank Golf Challenge
- SA Tennis Open
- 94.7 Cycle Challenge

QUIKDECK® SERVICE

The QuikDeck® Suspended Access System provides a modular platform that can be assembled from a few basic components and configured to fit into almost any shape or size. It can be built in the air, or on the ground and then hoisted into position. The equipment can be leapfrogged and relocated as work progresses, providing an even and stable work platform.

QUIKDECK® REDUCES THE RISKS OF CONVENTIONAL SCAFFOLDING and is safer, easier, and more efficient. It also supports higher loads with a load capacity of 366kg/m^2 and has been used in construction and repair of bridges; offshore platform painting; construction and maintenance of boilers; industrial pipe racks, painting and repair.

Our specially trained team ensures that platforms are built safely and efficiently. QuikDeck® is a product from US scaffolding leader Safway and meets all USA federal safety and health requirements.

CORROSION PROTECTION & INDUSTRIAL COATINGS

Our industrial Corrosion Protection services include specification, application, surface preparation and a choice of industrial coating and surface preparation recommendations.

These services are designed to meet the harsh conditions encountered in process engineering applications.

Our services include:

- High pressure surface preparation and cleaning
- Abrasive blasting
- Ultra-high-water blasting (UHP)
- Application of specialised coatings
- Suitable workmanship guarantees

SGB-CAPE IS A MEMBER OF CORRISA (THE CORROSION INSTITUTE OF SOUTHERN AFRICA)

THERMAL AND SOUND INSULATION & CLADDING

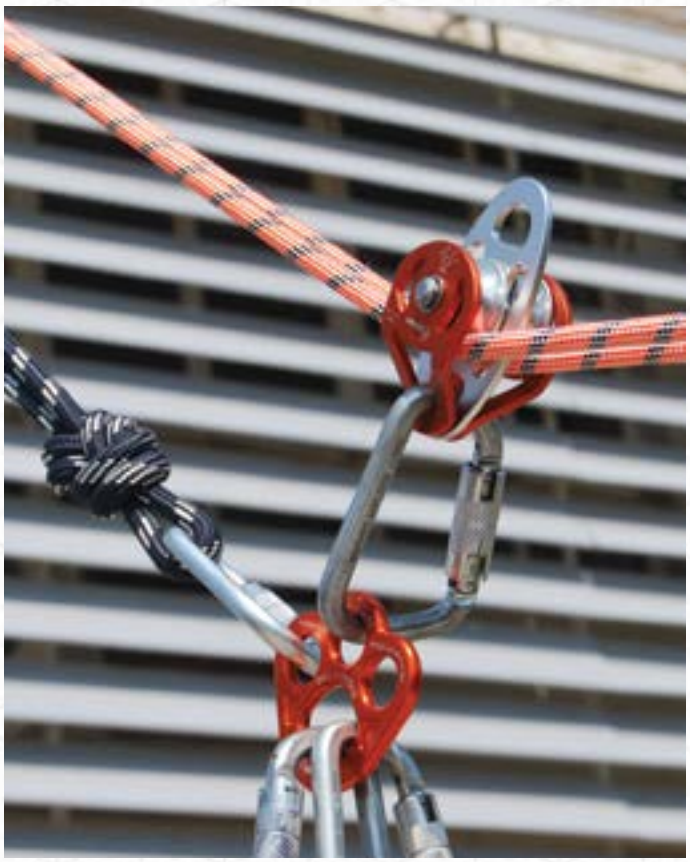
SGB-Cape offers the supply and application of thermal insulation and cladding systems with a temperature range of -200°C to +600°C. These services are designed to meet the demanding requirements of several industry sectors, including the petro-chemical, oil refining, power generation, paper and pulp, and general process engineering applications.

We offer a comprehensive sheet metal work service from our various regional operating centres including galvanized, aluminium, and stainless-steel cladding applications. We also have our dedicated sheet metal fabrication facility at our Kendal offices, equipped with sophisticated CNC machines and a MABI fabrication unit.

Our expertise allows us to perform advanced heat loss calculations and make recommendations on the most economical insulation and cladding application for a client's specific requirements. Our designs and techniques have been thoroughly developed and tested over years of thermal insulation contracting.

We are members of:

- **TIPSASA (THERMAL INSULATION PRODUCT AND SYSTEMS ASSOCIATION SA)**
- **NIA (NATIONAL INSULATION ASSOCIATION)**



FALL ARREST SYSTEMS

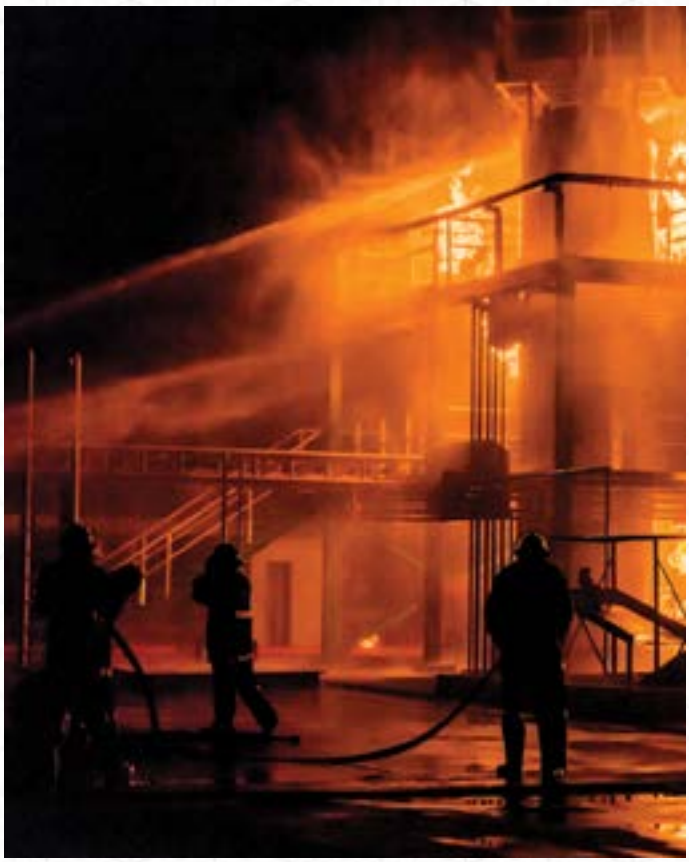
SGB-Cape has extensive expertise and specialises in the installation and product delivery of fall arrest systems in the working at heights market. Our staff combine technical experience with a passion for safety and quality to advise you on the correct fall arrest solutions. We deliver **PERMANENT AND TEMPORARY LIFELINE SYSTEMS**, certified anchor point installations, rescue stand-by teams, supply of fall arrest equipment as well as fall arrest project management and implementation.

ROPE ACCESS SERVICE

Rope access allows you to reach awkward, confined space works to perform technical inspections, painting, cleaning, repairs and maintenance, high rise installations and more. The rigging and de-rigging of ropes is significantly quicker than scaffolding which saves you money. In addition, down-time is saved as ongoing operations can usually continue. SGB-Cape expert technicians are experienced in working at heights across the construction, power, oil and gas, banner signage, industrial maintenance and telecommunications industries. Our technicians are trained to the highest standards to ensure safe and efficient operations. Regardless of the size or complexity of the job, whether it is working at heights training, lifeline installation or access, SGB-Cape can provide an affordable solution.

FIREPROOFING

When a mixture of flammable liquids, potential ignition sources from industrial plants, and exposed steel come together, **SGB-CAPE CAN PROTECT THE LIFESAVING PROPERTIES OF THE STRUCTURE** with the application of intumescent or cementitious fireproofing coatings. SGB-Cape is certified and trained by the manufacturers of these highly specialist products, and with our fleet of application equipment we can be trusted to deliver this mission-critical service.



ASBESTOS REMOVAL

Since 2008, the use of asbestos has been banned in South Africa. **SAFETY AND COMPLIANCE** are critical in the removal of hazardous materials. SGB-Cape has experienced specialists, trained and licensed in the process of up to type 3 asbestos abatement, and is an approved Asbestos Removal Contractor registered with the Department of Labour. We have completed numerous projects successfully and have ensured compliance to legislation at all times.

OFFSHORE MAINTENANCE

Supported by SGB-Cape's local branches and established networks in Africa, as well as a dedicated Project Management and Logistical Hub in Cape Town, South Africa, SGB-Cape's Offshore Division is well positioned to provide skilled inspection and maintenance teams to service the Oil, Gas and Marine sectors operating along the coasts of Africa and beyond.

The company is a well-resourced and capable contractor, focused on providing local capabilities and solutions close to our customers' key operational sites to enable prompt service delivery.

SGB-Cape has a long history of providing cost-effective Technical Solutions and Industrial Services to fulfil key processes and maintenance projects, **focusing on providing:**

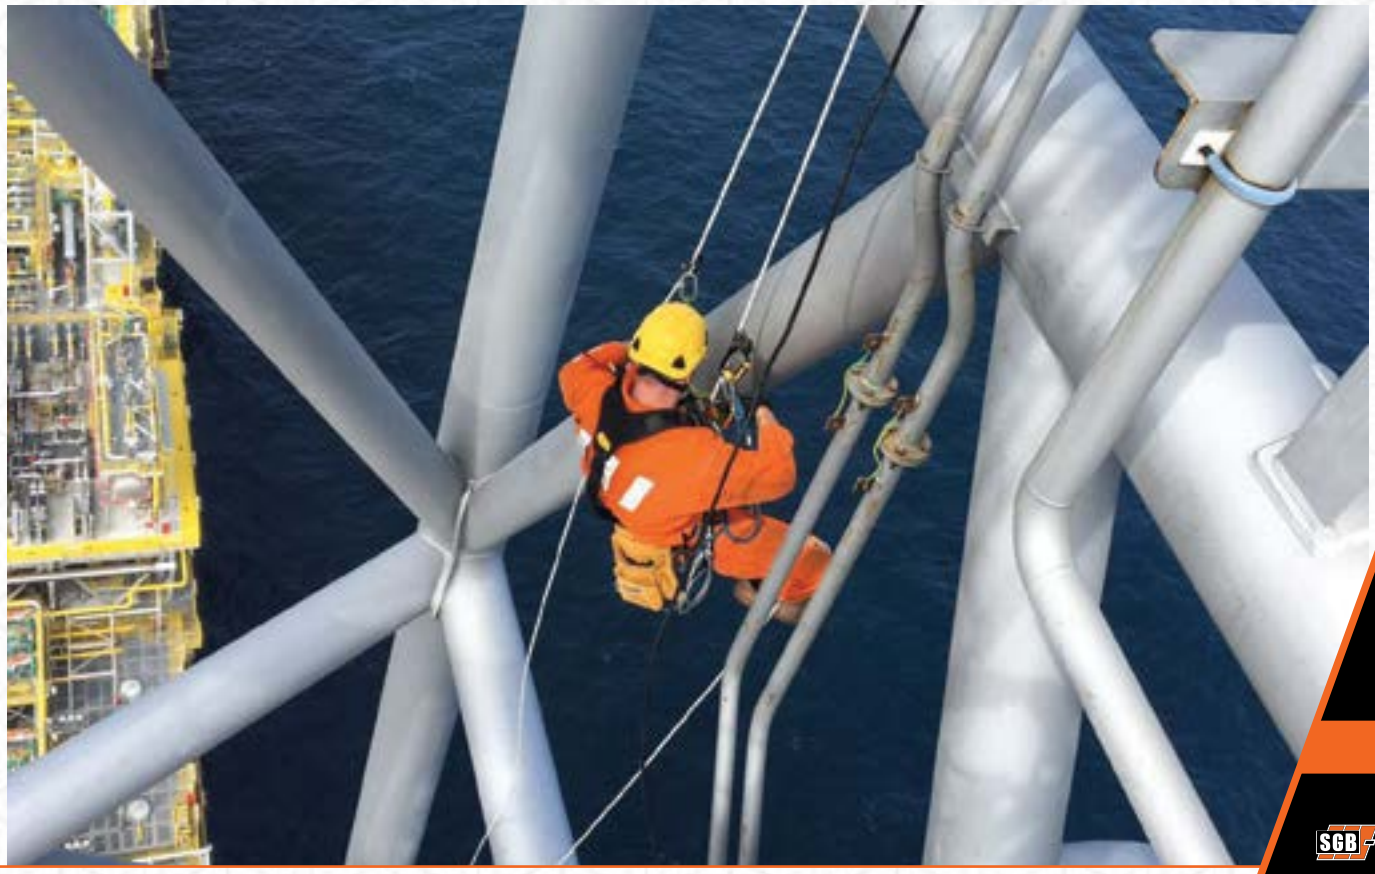
ACCESS SOLUTIONS: Scaffolding / QuikDeck® Suspended Platforms / Rope Access

CORROSION PROTECTION & FABRIC MAINTENANCE: UHP Water Blasting / HP Cleaning / Tank Cleaning

INSPECTIONS: UWILD Support / NDT Inspections / DROPS Surveys / Bolt Torquing

THERMAL INSULATION SERVICES AND CLADDING SERVICES: Hot and Cold Insulation

LIGHT STRUCTURAL REPAIRS: Rope Access Certified Fitters and Coded Welders / Passive Fireproof (PFP) / Application Services / Certified Asbestos Removal Contractors / Composite Pipe Repair Solutions / Plastic Wrap for Encapsulation



NDT: NON-DESTRUCTIVE TESTING

SGB-Cape offers various forms of Non-Destructive Testing.

These include:

- **ULTRASONIC TESTING:** Used to locate surface and subsurface defects, it measures thickness of materials and characterises properties on sound velocity and attenuation measurements.
- **MAGNETIC PARTICLE TESTING:** Used for crack detection in ferrous or magnetic materials. Specimens are magnetised, and if there is magnetic flux leakage it will be seen in the very fine iron particles applied to the specimen.
- **LIQUID PENETRANT TESTING (PT):** Dye Penetrant crack detection is used to locate cracks, porosity, and other defects that break the surface of a material and have enough volume to trap and hold the penetrant material.
- **EDDY CURRENT TESTING:** Eddy current inspection is also used to sort materials based on electrical conductivity and magnetic permeability.
- **PULSED EDDY CURRENT (PEC):** Pulsed Eddy Current manual inspection method is a controlled electromagnetic inspection technique used for measuring the thickness of steel objects, without the need for contact with the surface.

All NDT inspections can be combined with Rope Access, Scaffolding or Hydraulic lifts for inspections in hard-to-reach areas.

ACCREDITED TRAINING

All SGB-Cape training courses are facilitated and managed by Waco Training Academy (WTA).

Waco is a **SAQA** accredited training provider at the Construction SETA (CETA), Transport SETA (TETA), Services SETA (SSETA) and Health and Welfare SETA (HWSETA).

Courses in the following SGB-Cape related fields are offered by WTA or their accredited external providers:

- Access & Support Scaffolding
- Rope Access / IRATA®
- Marine Scaffolding
- Entertainment & Event Platforms & Seating
- Thermal & Sound Insulation & Cladding
- Corrosion Protection & Industrial Coatings
- Asbestos Removal
- Fall protection plan
- Fire-fighting techniques

The current range of scaffolding courses are based on **SANS 10085 (2024)** as well as relevant SAQA unit standards. We also provide specialist access training courses on Mobile Elevated Working Platforms (MEWPs) and Telescopic Booms, Tube and Fitting in line with International Standards and best practices.

WTA is also accredited to offer Health, Safety, Hygiene and Environmental training to national certificate level for the following courses:

- HIRA
- Legal Liability
- SHE Rep
- Incident Investigator
